

# PHEASANT DREAMS

*The over-and-unders chosen over and over.*

Anyone who has ever shouldered a fine over-and-under and stood behind a quaking dog on point knows that upland hunting involves more art than science.

But in order for you to enjoy your art, your gunmaker must know his science. Browning has the science covered in its complete line of Citori field guns.

We combine back-bored barrels and our

Investor Plus™ choke tube system to give you better patterns and softer recoil than lesser guns. The Citori is the only over-and-under with a traverse mounted, full-width locking bolt and hinge pin that actually seats deeper with use -- it wears in instead of out.

Citori shotguns have chrome-plated chambers for corrosion resistance and hammer-driven ejectors for reliability.

Why so much trouble? Because you're an artist. You don't want to lose any sleep worrying about such technical things. With a Citori you won't -- pheasant dreams.

**BROWNING**

[www.browning.com](http://www.browning.com)

All Citori 12 and 20 gauge shotguns feature back bored barrels and the Investor Plus™ choke tube system. All 28 gauge and .410 bore Citori models are standard bore and utilize the Standard Investor choke tube system.
